FROM THE LEADERS IN CIVIL AND PLUMBING SOLUTIONS

PLATINUM STAINLESS STEEL

PRODUCT NAME: Platinum Stainless Steel

SIZES USED: 40 x 1000mm, 1 x 665mm, 1 x 885mm,
1 x 1160mm, 1 x 660mm, 1 x 880mm, 1 x 1170mm.

WHAT IS IT? A stainless steel channel and grate system.

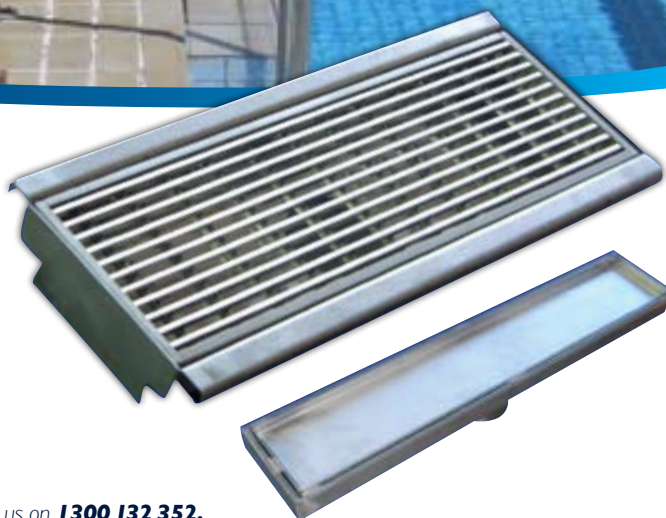

WHERE IS IT USED? Used for surface water drainage in commercial and domestic installations both indoor and outdoor.

The pool at the Peter McAuley Centre – the home of the Northern Territory Police in Darwin – was in need of a new grating system that would provide excellent aesthetic value yet be extremely durable.

With its PVC grating looking worn and discoloured the NT Government chose the strong, smooth lines of the Platinum Stainless Range to get the job done.

The old grating was removed and replaced with different lengths of the Platinum grates. Due to unconventional sizing between the steps and the end of each pool, numerous 1-metre lengths were used along the pools perimeter and supplemented by 7 different, individually sized grates to create the perfect fit.
