## NICOLL SURFACE DRAINAGE

**PRODUCT NAME:** Nicoll Surface Drainage.

**PARTS USED:** Kenadrain HD 150mm wide, 200mm wide and 300mm wide, Kenadrain HD/MD Sump 200mm outlet.

**WHAT IS IT?** A heavy duty surface drainage system.

**WHERE IS IT USED?** Commonly in public and commercial applications and where extra heavy duty performance is needed.

Optimum strength and durability were the top priorities when an Australian Army base in Queensland was in need of a surface drainage system – that's why the installers chose Nicoll.

Offering numerous advantages over traditional drainage systems, Nicoll's high-load capacity makes it perfect for commercial applications where heavy duty performance is needed.

While alternative brands would float when the concrete was poured, which resulted in lengthy installation delays, the Nicoll range solved all the problems the installer had experienced in the past.

Not only did Nicoll cost less to install due to its ease of application, it will last the test of time and the heaviest new artillery at the army base.
