FROM THE LEADERS IN CIVIL AND PLUMBING SOLUTIONS

NICOLL SURFACE DRAINAGE

PRODUCT NAME: Nicoll Surface Drainage.

PARTS USED: Kenadrain HD 300mm wide Heavy Duty Ductile Iron Class E.

WHAT IS IT? A heavy duty surface drainage system.

WHERE IS IT USED? Commonly in public and commercial applications and where heavy duty performance is required.

When developing the hills around Airlie Beach, steep slopes and high rainfall are key considerations. With this in mind, the developer of this residential estate was looking for a solution to cope with the high level of water that would flow down the road in a high rainfall event.

The Nicoll range was chosen due to its ability to cope with the flow and potential heavy load vehicles using the road. The ductile iron grate also provided a neat professional finish in keeping with the rest of the development.
