FROM THE LEADERS IN CIVIL AND PLUMBING SOLUTIONS

PLATINUM STAINLESS STEEL CUSTOM & CONTINUOUS COMBINED WITH NICOLL CHANNEL

**PRODUCT NAME:** Platinum Stainless Steel Custom and Continuous combined with Nicoll channel.

**PARTS USED:** Custom made products to suit the specific application.

**WHAT IS IT?** A stainless steel Wedgewire grate and channel system.

**WHERE IS IT USED?** Used when needing a functional surface drainage solution that is pleasing to the eye.

When renovating their upmarket home, the clients needed a stylish solution to a very functional problem of surface water. They needed to drain water away from a sliding door threshold, from a screen less shower and from the entrance to their driveway and each application needed a designer finish to fit with the rest of their home.

In order to achieve the result they were looking for, 100mm Platinum Stainless steel continuous channel and grate was used for the threshold. Designed to click together additional lengths, the product allowed for a long continuous run of channel to be used, combined with 1m wedgewire grate lengths.

The shower area had been designed in order to avoid the use of a screen but this meant that an effective drainage solution was required in order to keep the rest of the bathroom tiles dry. A custom made solution was developed in order to fit the space allowed and also to position the outlet for the drain effectively.

The driveway project required a unique combination of products. In order to cope with vehicle loads, Nicoll channel was used and combined with a Platinum Stainless Steel grate. The result of which is a garage entrance that is very functional and pleasing to the eye.
