FROM THE LEADERS IN CIVIL AND PLUMBING SOLUTIONS

AKATHERM DRAINAGE

PRODUCT NAME: Akatherm Drainage.

PARTS USED: 110mm and 56mm couplers, elbow and tees.

WHAT IS IT? A HDPE Drainage system.

WHERE IS IT USED? Commonly in high rise buildings, increasingly in green building developments.

When Philmac was asked to contribute drainage products to the Master Builders Green Living Charity Home in SA – it knew that the Akatherm range would be the perfect solution.

The home, which will be auctioned off to raise vital funds for charity, was the first to gain an 8-Star green rating and showcases environmentally products and design features.

Philmac's range of Akatherm High Density Polyethylene (HDPE) pipes and fittings provide a 100% recyclable solution while ensuring efficient and effective drainage – in line with the 'green' focus of the home. Their production creates a lesser carbon footprint than in the case of alternative drainage systems - and their high performance materials ensure they'll last the test of time.

Akatherm's HDPE Drainage system has been used in large commercial buildings in Australia and around the world for many years. Philmac is proud to have donated proven, durable products to this environmentally-friendly home, for the benefit of local charity.
