Complete with tube and adaptor

A purpose built stake featuring the proven “hammer head” design.

■ Operation
  Screwed inlet accepts a variety of 4mm emitters.

■ Application
  Positioned away from the main tube, the stake can be moved around as plants develop, providing the most professional method of installation. Retention hole allows for tidy placement of supply tube.

■ Convenience
  Simple snap-off adaptor for quick connection to lateral.

■ Material
  Tough engineering plastic ensures trouble-free installation and service life.
A rigid riser can be mounted on the landscape stake to increase the height of the jet.

Suitable for a variety of emitters.

FLOW CONTROL VALVE (if required)

FLEXIBLE RISER TUBE

ADAPTOR

---

RECOMMENDED USE:
Products described above are designed and manufactured for micro irrigation use and therefore have a maximum recommended operating pressure of 380kPa. The products must be used with suitable filtration (where applicable) to avoid blockage or damage to working components.
