TECHNICAL SPECIFICATIONS

Philmac[®]

ADJUSTABLE 8 OUTLET DRIPPER WITH RATCHETING ACTION

Operation

- Rotate the cap to the desired flow. Each clicking action advances the discharge gradually from a low volume drip, to a high volume bubbler and finally to 8 gentle streams
- The cap can be rotated to the closed position
- Pressure compensating (PC) version is available with a nominal 40 L/h discharge and a pre-defined diameter of throw

Performance

- Each click increases the flow and the diameter of the streams (see overleaf)
- The stream trajectory is designed to clear localised interference from foliage

Versatility

- Barbed inlet to suit LDPE
- Threaded inlet to suit rigid risers

Applications

- Small or large pot
- Planter boxes
- Hanging baskets
- Garden beds
- Landscape areas

RECOMMENDED USE:

Products described above are designed and manufactured for micro irrigation use and therefore have a maximum recommended operating pressure of 300 kPa. The products must be used with suitable filtration (where applicable) to avoid blockage or damage to working components.

Please note that the information opinions recommendations and advice given on this specification sheet are supplied only to provide an improved understanding on the technical aspects of Philmac products. So far as the law allows, Philmac Pty. Ltd. will not accept liability in respect of any loss or damage of any kind claimed to arise as a result of reliance upon any information contained on this specification sheet. Please refer to our Term and Conditions of Supply of Goods.
