FOOT VALVE FLOAT RIG KIT

95 5010 00 For 1-1/2" and 2" foot valves

This float rig is designed to support either a 40 mm (1 1/2") or 50 mm (2") foot valve in dams and waterways. By keeping the foot valve at the desired level, problems such as picking up mud, debris, or sucking air can be avoided. The rig and components are made from non-corrosive materials.

The kit includes a pack of stainless steel screws, two pieces of high load rated nylon cord for fixing floats, two different saddle tops, and two 1/2" BSW thread float connectors. Alternate configurations using stainless steel chain, double or single floats can be used to suit the application as required. Foot valves and floats are supplied separately (see page 80).
